

10gen is the company behind MongoDB, the leading NoSQL database. MongoDB (named from "huMONGOus," meaning "extremely large") is reinventing data management and powering big data. Designed for how we build and run applications today, MongoDB empowers organizations to be more agile and scalable. It enables new types of applications, better customer experience, faster time to market and lower costs. MongoDB has a thriving global community with 4 million downloads, 50,000 Online Education registrations, 15,000 MongoDB User Group (MUG) members and 10,000 annual MongoDB Days attendees. The company has more than 600 customers, including many of the world's largest organizations.

## MongoDB Training Overview

10gen can help customers build, run and deploy applications on MongoDB through professional training. MongoDB training enables organizations to improve developer and end-user experience, reduce time to market, decrease deployment costs and lower business risk. 10gen training covers document databases, schema design, performance optimization, high availability and fault tolerance, scaling, real-time analysis and other areas.

## MongoDB Training Services

10gen offers a variety of training options to suit organizations of all sizes and types, as well as individual developers and administrators:

- » In-Person Training (Public and Private)
- » Workshops at MongoDB Days
- » Online Education

### IN-PERSON TRAINING

10gen offers in-person training courses around the world taught by experienced instructors and engineers. Courses involve lessons along with hands-on labs to develop knowledge and practical skills.

- » **MongoDB for Developers** – This course serves as the foundation for developers who are planning to build and design applications on top of MongoDB. It covers data modeling, queries and insert/update/deletes, an introduction to MapReduce and basic administration.
- » **MongoDB for Administrators** – This course covers everything database administrators need to know to deploy and maintain a MongoDB database, diagnose performance issues, import and export data from MongoDB and establish proper backup and restore routines.
- » **MongoDB Essentials** – This course combines the Developer and Administrator trainings into one. Instead of taking two 2-day courses, this training covers the same content in just 3 days.

10gen offers trainings in both public and private, onsite formats.

	PRIVATE TRAINING	PUBLIC TRAINING
<b>Description</b>	Private trainings are delivered to organizations onsite. These trainings can be customized to suit our customers' needs.	Public trainings are open to anyone and offered in cities around the world. Please visit <a href="http://www.10gen.com/products/training">www.10gen.com/products/training</a> for a schedule of upcoming trainings.
<b>Pricing</b>	Per-Course	Per-Person

## WORKSHOPS AT MONGODB DAYS

Customers can attend in-depth, hands-on workshops together with one of 10gen's MongoDB Days, held many times a year at locations around the world. Workshop topics include schema design, performance and architecture considerations.

## ONLINE EDUCATION

10gen offers free online courses to empower users to build and deploy MongoDB. Tens of thousands of users have already registered. There are classes for both developers and database administrators. Online classes run for seven weeks and are similar to traditional college classes, with weekly lectures, homework assignments and final exams. Visit [education.10gen.com](http://education.10gen.com) to register for free.
